The MAILING DATE of this comm Period for Reply	nunication appears	on the cover sheet with the c	orrespondence ad	ddress					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailling date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1) Responsive to communication(s	Responsive to communication(s) filed on								
2a) This action is FINAL.	This action is <b>FINAL</b> . 2b)⊠ This action is non-final.								
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims

## Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 are rejected under 35 U.S.C. 103(a) as being unpatentable over Traver (1910655) in view of Borden et al (2921756).

Traver shows a powered craft V and a pivoted connection 17 with biasing means 52 and 75 to connect the flying craft to the powered craft which stays in front. Borden et al teaches that the flying craft can be pivotally connected to a powered craft via a biased connection that is biased via hydraulic cylinders 14 and 27 that bias in both directions ie. toward and away from the various craft. It would have been obvious to one having ordinary skill in the art at the time the invention was made to bias the pivot connection of Traver with hydraulic cylinders as taught by Borden et al since it will enhance the relative postioning of the two craft.

1. Claims 2-6,8-9,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Traver in view of Borden et al as applied in paragraph above, and further in view of Kobayashi (5094638). Kobayashi (5094638) shows a similar craft to that of Traver only it is on the water and the operator in the winged craft controls both it and the powered craft.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to control the powered craft of Traver from the winged craft as taught by Kobayashi since it will make it a water craft and a single operator craft.

1. Claims 7,10-14,16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the
